

## **REMARKS**

The amendment in Paragraph 1 of the specification simply inserts a publication number for an application originally identified only by serial number. The amendment in Paragraph 3 deletes an obviously superfluous digit at the end of a publication number.

The first amendment in Paragraph 13 is a correction of a minor clerical error, the need for which is apparent from Office records. The list of patents and applications in this Paragraph is stated to be of E Ink and MIT patents relating to electrophoretic displays. U.S. Patent No. 6,249,721 is not assigned to either E Ink or MIT and does not relate to this technology. Hence, correction is obviously required, and Office records show that the correct Patent No. 6,249,271 must be intended. The second amendment in Paragraph 13 simply deletes a repeated publication number.

The amendment in Paragraph 41 removes an erroneous statement that there was a previous mention of Patent Publication No. 2002/0106847; there is in fact no earlier mention of this publication. Similarly, the amendment in Paragraph 107 corrects an erroneous statement that there was a previous mention of Application Serial No. 09/683,903; in fact, the previous mention of this application was to the Publication No. 2002/0131147, and hence the Paragraph has been corrected to refer to this publication number. Finally, the amendment in Paragraph 274 corrects an obvious clerical error.

No new matter is introduced by any of the aforementioned amendments.

In response to the election requirement set out in the Office Action, applicants hereby elect Group I, claims 1-35. This election is made without traverse. The non-elected claims 36-41 have been cancelled without prejudice to applicants' right to file divisional and/or continuation applications directed to the subject matter of these claims. This election requires a change in inventorship and an appropriate Petition is filed herewith.

An Information Disclosure Statement is also being filed herewith.

Respectfully submitted
